

Empowering The Future Globally

Achievers Learning Centre

Certified Lean Six Sigma Yellow Belt

Structured problem solving training course

Fundamental course information

Level -

The Yellow Belt introduces the key principles and tools of Lean and Six Sigma methodologies. It's perfect for beginners seeking to understand process improvement and operational efficiency.

Whether you're new to problem-solving or looking to refine your skills, this course offers a structured, well-established methodology. You'll gain practical knowledge of the eight-step approach and the seven basic quality tools, enabling you to apply them with confidence.

Designed for participants across all organizational levels and industries, this course empowers you to tackle real-world business challenges and drive measurable improvements.

Through a blend of experiential learning, expert-led discussions, and structured content, this 20-hour course delivers a high-impact experience. Our accelerated learning framework enhances retention and skill transfer, empowering you to drive meaningful change in your workplace.
